

Make it a Ritual

Hair Mask Ritual

Apply oil to dry hair. Gently run the dropper through your scalp—top, sides, and underneath. Massage in slowly with fingertips. Then add oil to your palms and coat the ends of your hair. Bonus: your hands and nails benefit too.

Wrap hair in a cloth or cap. Leave in for 1 hour, or overnight for deep nourishment. Wash out with shampoo (twice); consistent use will allow you to forgo conditioner.

Note: Oils older than 6–12 months may develop a stronger scent. If left in overnight, some may feel light-headed. This is not harmful—just wash your hair. One hair mask per week is ideal (max 2). Oils left in hair may effect pillow linens.

Facial Ritual

Start with 3–5 drops. Gently press or glide onto clean skin. Less is more—you can always add after. Enhance the ritual with a crystal roller, gua sha, or gentle massage. Let the oil work its magic while you breathe deep into your belly and slowly release.

Sensitive Skin Ritual

Do not touch the dropper to skin—keep it clean. Begin with 1–2 drops. Gently sweep across the area—no need to rub (especially if the skin is sensitive). The oils will absorb naturally. Reapply every 2–6 hours as needed when healing or soothing. Continue for 3–7 days after affected area is clear. Discontinue use if irritation worsens. Consult your doctor.

Foot Ritual

Warm a few drops between your hands. Massage into feet with slow, circular motions—heels, arches, toes. Breathe deeply. Ground. Perfect before sleep or after a long day.

Bath Ritual

Add oils or bath salts to an empty tub, and fill with warm water. A tub for either a foot bath or a big-girl-2-hour-long-soak bath. This ensures the salts dissolve fully before touching your skin. Remove any crystals before draining—keep them as little treasures.

Create Space For Yourself

Light candles. Play music you love. Sit outside on the grass. Read a book. Cook your favourite meal. Watch a good movie. Breathe. Dance. Whatever makes you sigh in relief.

Daily Wearing Tips

Cleanse skin in the morning. Apply oil as per the Facial Ritual. If you are wearing makeup, wait 5 minutes. Apply makeup as usual. For night time: Cleanse. Apply your oil. Wait 5 minutes before closing your eyes for bed. And let your skin drink it in while you sleep. Oil should not affect bed linens, hair, or clothing.

APPROACHABLE APOTHECARY

An apothecary is simply a place where natural remedies are made to support everyday health. Because we're so used to convenience, it can feel unfamiliar to have your own handmade remedies. So I have made my products (and this guide) as a gentle place to start.

Oils (Dropper Bottles)

For skin support, nourishment, and targeted care.

How to use:

- Apply a small amount to clean skin
- Gently massage into the area you're supporting
- Use once or twice daily, or as needed

Good to know:

- A little goes a long way
- Can be used on the face or body ("Move" should not be applied to face)

Safety:

- For external use only. Avoid eyes.
- Patch test if you have sensitive skin

Standard Rollers (Clear Bottles)

For easy, everyday support.

How to use:

- Roll onto pulse points on wrist + neck, temples, or the area needing support
- Also roll "Home" onto bottom of feet
- Use as needed throughout the day

Good to know:

- Designed for gentle, regular use
- Suitable for daily support
- "Soothe" is great for children

Safety:

- External use only. Avoid eyes.
- "Home" may cause drowsiness. Do not combine with medication. Not suitable for children.

Bath Soaks (Salts)

For full-body support and relaxation.

How to use:

- Add a small handful to a warm bath
- Soak for 15–20 minutes (or 2 hours...)
- Collect crystals before draining

Good to know:

- Can also be used as a foot soak
- Drink water before and after bathing

Safety:

- Avoid if you have open wounds
- Use caution if pregnant or breastfeeding

20 Rollers (Amber Bottles)

More concentrated blends for targeted support.

How to use:

- Roll onto clothing collars, bedding, or teddies for aromatic use
- Can be inhaled by holding near (not inside) the nose
- If applying to skin, dilute first with a carrier oil

Good to know:

- These blends are stronger than standard rollers
- A small amount is enough

Safety:

- External use only
- Avoid eyes and broken skin
- Patch test before skin use
